1. The following is an examiner's statement of reasons for allowance: the amendment filed 8/13/2004 has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest a tracking/latching unit for receiving the differential output through a main input terminal and a sub input terminal of the tracking/latching unit in order to perform the track mode operation and the latch mode operation according to the clock signal, wherein each of the main input terminal and the sub input terminal has a different current pass for having a constant gain of the comparator during the track mode operation as called for in claim 1. Therefore, claims 1-17 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
